'57 Grassland Baseball Acclaimed

GRASSLAND — After many years, community residents here are able to claim a baseball team, according to some sports critics.

These critics, disregard the previous teams here and begin their reckoning with the current team, which they say is one of the best in the circuit.

Although the record isn't outstanding this year, say these observers, the current Grassland team has made top notch teams race hard for points.

For instance, say the members of this new party, Wandering River had to use three pitchers to defeat Grassland 16-11 on the Wandering River Sports Day. This score and the resistance of the Grassland players, say their supporters, is a far cry from the years when the Wandering River team, regarded as the best team of this area, could have administered Grassland an embarrassing drubbing.

Feeding the nation may be a glorious calling, but the farmers are just as interested as business in adequate cash returns.

Pulpwood Total Increases 550%

A marked increase of 550% in pulpwood production is reported by the Alberta Bureau of Statistics for the first quarter of 1957.

The report states a total of 18,553 cords was produced, compared with 2,285 cords in the same period last year.

Demand for pulpwood by the North Western Pulp and Paper Co. mill at Hinton is the prime reason for the heavy increase. Drawing supplies from private farms and a 6,000 square mile lease of forest land, the mill has added payrolls and a new cash crop to Alberta's economy.

Production is planned for a daily output of 430 tons of special pulp. The basic product can be later used in paper manufacture or related processes.

DIEFENBAKER FOR STAMPEDE

Prime Minister John Diefenbaker's first official act in western Canada since assuming office will be to present trophies to cowboy champions at the Calgary Exhibition and Stampede the evening of July 13.

F. C. Manning, exhibition president, announced Thursday Mr. Diefenbaker has accepted an invitation to close the 1957 Stampede.

The new prime minister is believed to have made arrangements to fly directly to Calgary from London so he can be in time for the event.

As is customary, he will be presented with a white cowboy hat and then he will give a five-minute talk to the grandstand audience. A full day of activities has been planned for Mr. Diefenbaker if he arrives in time.

'GO WEST,' TO ALBERTA MORE APPLICABLE THAN EVER

MURRAY BAY, Que.—J. R. McDonald of Montreal told the Canadian Electrical Association annual convention recently that in view of progress and future prospects of industrial development in Alberta, the old admonition "go west, young man" is more applicable now than at any time in Canada's history.

A discussion even 10 years ago of industrial development in Alberta would have aroused little interest, said Mr. McDonald, president of J. T. Donald and Company.

But in the last 10 years nearly $3,500,000,000 had been spent on exploration, development, production and marketing facilities for oil and natural gas, which have become the mainstay of the provincial economy and the cause of the phenomenal expansion.

Wedding Vows Pledged

FRAINS—In an Edmonton church with two baskets of gladioli for decoration, Miss Bernice Theissen and Mr. Lawrence Nahorney, eldest son of Mr. and Mrs. Walter Nahorney, exchanged marriage vows.

The bride wore a gown of lace over satin, featuring a lace bolero with lily point sleeves. A tiara, trimmed with sequins, held her veil in place. Her only jewelry was a wristwatch, given to her by the groom. She carried a bouquet of red roses and white jonquils.

Her sister, maid of honor, wore a blue lace gown, while the three bridesmaids wore gowns of coral satin and rose tulle headdresses. The groom's attendants wore black suits and black bow ties.

Mrs. Phillips played the wedding march. Mr. Jack Samograd, the guardian father of the bride, gave the former Miss Theissen in marriage. Three solos were sung by Mr. Norman Metico.

More than 250 guests attended the reception in the Ukrainian Center, which followed the ceremony.

Mrs. Samograd attended her daughter's wedding in a dress of light green with white accessories and a rose corsage. The mother of the groom chose a lilac dress with white accessories and a corsage of yellow carnations.

The bride's table was centered with a four-tiered wedding cake. The groom's uncle, Dr. Melnechuk of St. Paul proposed a toast to the Queen. Elder Skortez lead the toast to the bride. A program of songs and verse described the earlier days of the young couple.

The wedding trip was to Oshawa, Ont., to meet the family of the bride and to parts of the United States.

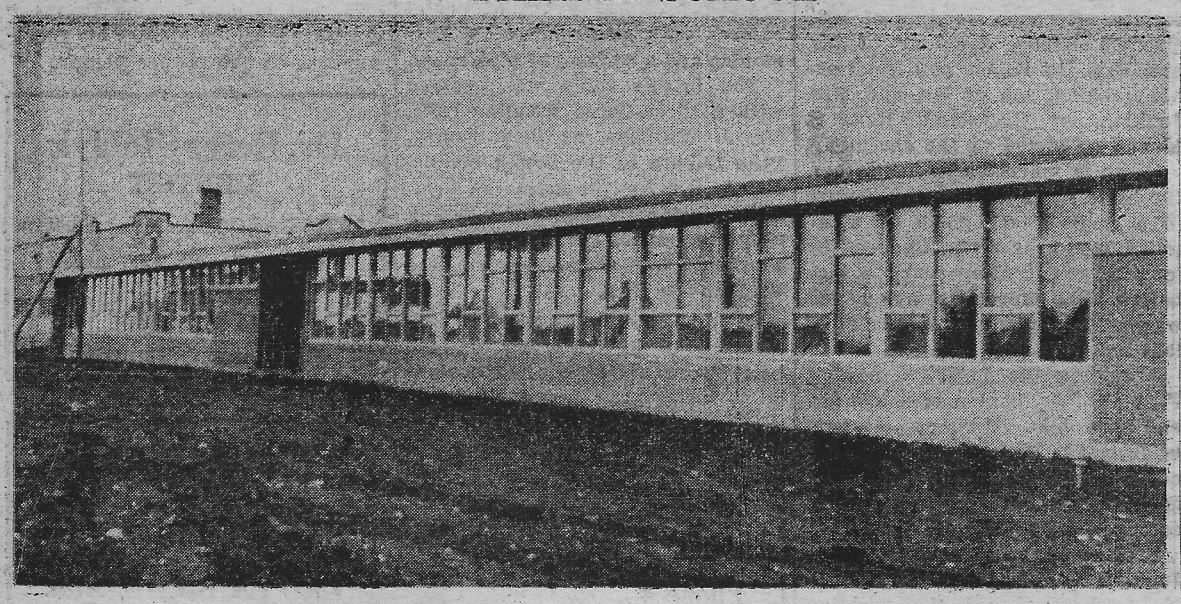
NEW FALHER SCHOOL



With the opening of the new Routhier school at Falher June 12, the Falher consolidated school district will now have at its disposal 16 classrooms, a science room, home economics room, typing room, library, gymnasium, an auditorium 84 x 56, and a stage 69' x 20'.

This was achieved by connecting and integrating a six-room school, constructed in 1929, and a four-room school, constructed in 1950.

The red brick school house built in 1919 was torn down to provide the place for the new structure.

The recent structure will cost $263,000, of which $150,000 will be paid by grants from the Province of Alberta and $113,000 will be repaid over a period of 25 years.

The additional construction was needed to replace the school rooms rented in the college and the four rooms in the school that had to be torn down.

The Board took advantage of the maximum grants available in view of the fact that the construction contained more than 16 units.

The architect was Diamond Dupuis and Dunn. The contractor, Buchanan Construction and Engineering Limited.

Present board consists of P. A. Sicotte, chairman; Gerard Bugeauld, Raoul Lauzin and G. R. Levesque, secretary treasurer.

There are now 425 students in Routhier school.

Council Sets Mill Rate; Hears Petition On Water, Sewer Extensions

The regular monthly meeting of the Berwyn village council set the mill rate for 1957 at 50, the same as for 1956. Tax notices have been prepared and sent out. The discount date will be July 1, and a 3% discount will be allowed up to that time.

The council received a petition signed 100 per cent by residents of the south end of the village requesting water and sewer extension to service that area. The council decided to turn this over to the engineer and asked that a survey be made of the area with a view to determine the cost of the proposed project.

A request from one resident for the closing of a lane was also received and the secretary was asked to contact the minister of highways seeking his approval. The secretary also reported that the monies had been received from the Alberta Municipal Finance Corporation. It was moved that a letter of thanks be sent to those in Edmonton who assisted the council in the preparation of the necessary papers for the borrowing.

The council decided to underwrite the cost of a hose laying team at Grande Prairie on June 19, when all fire departments of the north will be represented. The council also requested the secretary to determine the costs of increased coverage on the liability insurance carried by the village.

The mayor and secretary-treasurer will represent the village at the meeting to be held in Grimshaw in the near future regarding the setting up of the board for the home for the aged and infirm. Several other items of interest to the fire department were discussed and action taken.

District Agriculturist Notes

By J. S. LORE

It is competition that causes the damage when weeds infest the field competition for the moisture, plant food, light and air needed by the crops. Competition means reduced tillering and lowered crop yields. That is why Henry Friesen, Agronomist in charge of Field Husbandry at the Lacombe Experimental Farm, stresses early spraying for weed control. Spray when the weeds are small, he advises. You will not only have better crops but the weeds will be easier to kill.

Experience at Lacombe last year again supported the recommendation for early spraying. A crop of oats was badly infested with hemp nettle. MCP was the chemical used. Untreated, the oats yielded 53.5 bushels to the acre and the hemp nettle weighted 905 lbs. dried. Sprayed when the oats had 3 to 4 leaves and the hemp nettle 4 to 6 leaves, the oat yield was 79.5 bushels and the weed weighed only 227 lbs. Six ounces per acre was the amount of MCP applied. Similar treatment when the oats were in the shot blade neither improved the crop nor harmed the nettles.

Other results tell the same story. Tests at the University of competition and increased crop Manitoba have shown reduced yield from earlier spraying of flax, wheat and oats infested with wild mustard. Reduction of basal branching of flax and reduced tillering of the wheat and oats due to competition was an important factor in reducing yield. It pays to spray early, says Mr. Friesen. Kill the weeds while they are young and give your crop the chance it deserves. Spraying before the grain crop reaches the 5-leaf stage is Mr. Friesen's recommendation.

Earl Whelen's school bus took the school ball teams to Sugden picnic June 15. Many district residents also attended.

Newlyweds To Reside In Grande Prairie

The Lac la Biche United Church, decorated with baskets of spring flowers made an attractive setting for the afternoon wedding of Miss Patricia Kibbe, daughter of Mr. and Mrs. Ira Kibbe, and Mr. Donald Jenkins, son of Mr. and Mrs. Jenkins, of Grassland. Rev. S. Munro officiated at the ceremony.

Given in marriage by her father, the bride made a charming picture in a floor length gown of white nylon lace over satin, featured by long lily-point sleeves and a lace bolero. Her finger-tip nylon veil was held in place by a circlet of lace and nylon.

Attending the bride were Miss Faye Proctor, cousin of the bride, and Miss Joan Tikkhanen, as first bridesmaid. Both wore turquoise net gowns of ballerina length with matching headdresses and carried corsages of pink carnations.

Brother of the groom, Mr. James Jenkins, acted as best man. Mrs. M. A. Lett played the wedding music and Mrs. Clark was soloist.

Following the ceremony, a reception for over 100 guests, was held in the Memorial Hall, which was decorated with spring flowers.

To receive her guests, Mrs. Kibbe wore an afternoon dress of gold acetate nylon with matching accessories and a corsage of yellow roses. The groom's mother was dressed in floral nylon of pastel colors, with accessories to harmonize and a corsage of pink roses.

The bride's table was centred with a three-tiered wedding cake. Mr. J. Williams, as toast-master, gave tribute to the young couple. Mr. A. Proctor proposed the toast to the bride to which the groom ably responded. Following the reception, a well-attended dance was held in the Hall.

Mr. and Mrs. Jenkins are honeymooning Utah. For travelling, the bride wore a flecked light-weight suit, with accessories to harmonize.

The couple will make their home in Grande Prairie.

It's human nature to put the blame for everything on somebody else, but a man begins to make progress when he blames his shortcomings on the proper person.

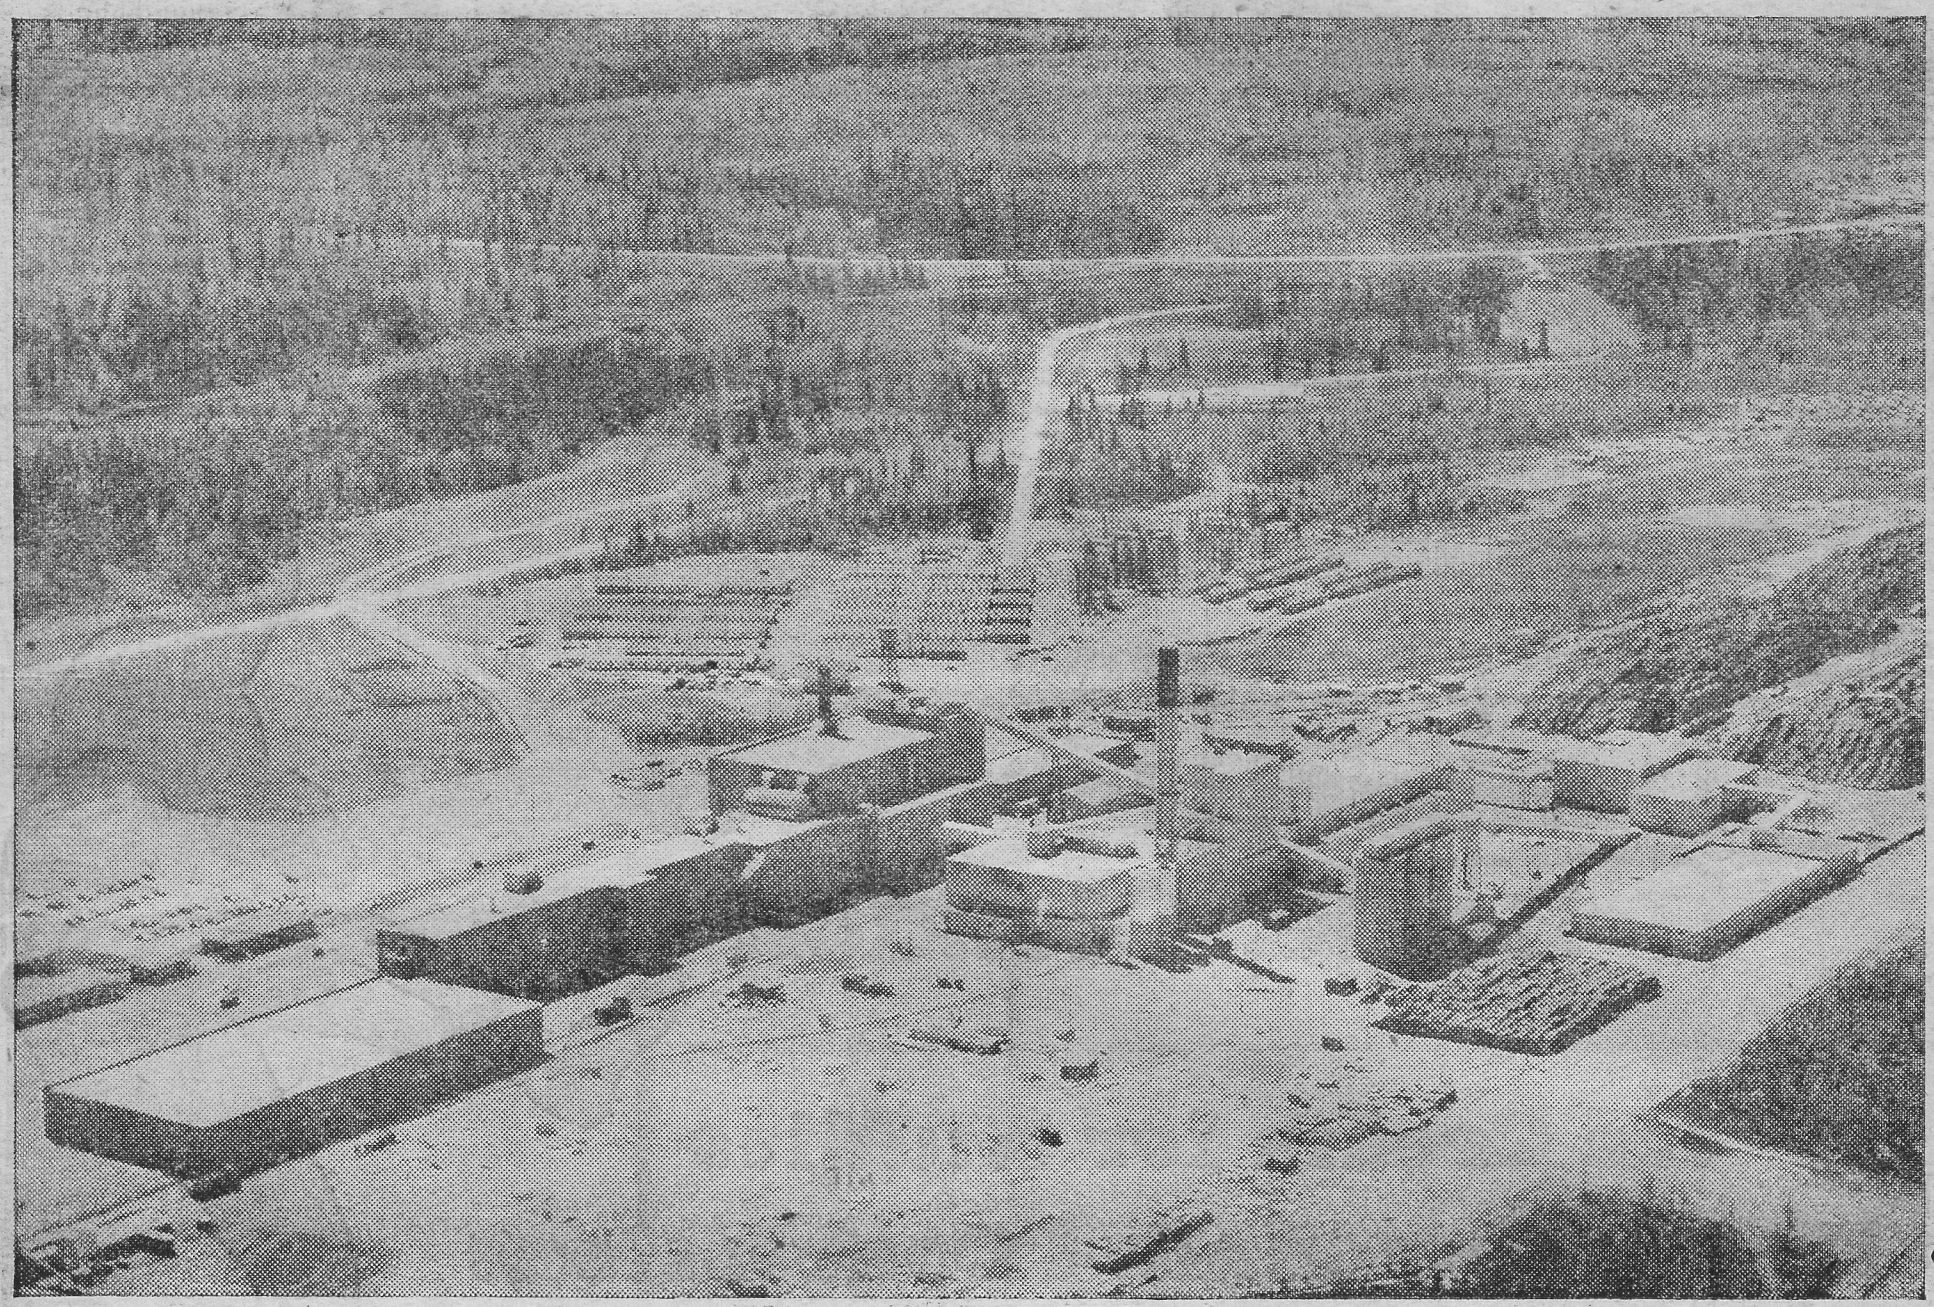
ANOTHER MILESTONE FOR CANADA



Now pulp and paper markets in Canada and the United States are assured of a constant, on-the-continent supply of top-quality bleached sulphate pulp ... produced in Canada. This special pulp – Alberta Hi-Brite – will be turned out at the rate of 430 tons a day by our mill at Hinton, Alberta.

Much of the credit for this project must go to the government of Alberta. It set aside six thousand square miles of territory for the mill and for the spruce and lodgepole pine forests that feed it. The land is managed on a sustained-yield basis. This provides that the amount of wood cut will *never* exceed the rate of wood growth. Thus, while the mill turns out its large quantities of Alberta Hi-Brite, Alberta's fertile forest acres will be continually replenished for the future.

Alberta Hi-Brite, produced from trees with fibres that give outstanding strength and formation, is used wherever a new whiteness and brightness is needed in paper or paper products. The mill was jointly financed and is owned by St. Regis Paper Company (Canada) Ltd. and North Canadian Oils, Ltd. and was constructed and is managed by St. Regis Paper Company, who join us in bringing to Alberta, and to Canada, another important contribution to the pulp and paper industry.
